

USB Italy welcomes the 12th National Congress of NEHAWU.

Thank for the invitation.

your congress is today a very important step because the scenarios have changed with the pandemic and the attack to our class is more and more acute, in different forms but in every part of the world.

The pandemic has highlighted the failure of a system that has put in first place the continuity of production and profit instead of the health of people, leading to millions of deaths around the world.

in the current international context of hypercompetitiveness between imperialist poles, where the economic crisis and the pandemic have further worsened the condition of workers and peoples, the function of class unions is increasingly crucial.

Our work, the growth and strengthening of the WFTU is the road we must continue to travel.

Good work for your important congress
